# collector<sup>TM</sup> 170,250,320

## Characteristics

- perfectly synchronizes, delivers and stacks
- synchronizes and controls the flow of material
- free access for adjustments
- increase your productivity! Lower your costs!

## swiss quality <sup>®</sup> collector <sup>™</sup> 170,250,320

### Characteristics

#### Collector

In a post process the Collector Unit permits perfect synchronization, stacking and delivery of (already) cut sheets after the Fotoba Cutter.

#### Advantages:

Synchronizes and controls the flow of material, post process to the Collector.

The direct flat surface guarantees that even heavy and extremely flexible media (over 900g/m<sup>2</sup>) has a clean and exact end cut.

The rigidity load caused by hanging media is eliminated by using the feeder section with the conveyer belts, therefore (distortion warping) corners during lateral cutting is avoided.

With pneumatic control, the feeder section of with its conveyer belts can be opened up 90 degrees. This allows free access between post process and Collector for adjustments.

The two-meter-long storage unit has 4 adjustable positions up with a final flat work table.

Increase your productivity! Lower your costs.

Easy to use, built for durability

#### The Collector is available in 3 versions:

**Col-170** For use in combination with post process  
For materials up to 180cm wide

**Col-250** For use in combination with post process  
For materials up to 260cm wide

**Col-320** For use in combination with post process  
For materials up to 350cm wide

#### Only Collecting table:(Table surface coated wood)

**CT-170** For use in combination with post process  
For materials up to 180cm wide

**CT-250** For use in combination with post process  
For materials up to 260cm wide

**CT-320** For use in combination with post process  
For materials up to 350cm wide

#### Technical Data:

230V A-5A  
Compressed air connection required: 5 bar

No power. No air

Col-170 Dimensions: L 250cm x B 180cm x H 100cm

Col-170 Dimensions: L 200cm x B 180cm x H 100cm

Col-250 Dimensions: L 250cm x B 260cm x H 100cm

Col-250 Dimensions: L 200cm x B 260cm x H 100cm

Col-320 Dimensions: L 250cm x B 350cm x H 100cm

Col-320 Dimensions: L 200cm x B 350cm x H 100cm
