On
Demand

BARCODE SCANNER / PRINTER

Barcode scanning and printing system puts an end to inputting dimensions on software for specific boxes every single time. You can scan product barcodes on your products, and the software will bring required (predefined/saved) box model and its dimensions to screen automatically. The package you need is produced in a single operation. In addition, you can print labels with company logo, barcode, box dimensions for each box you produce.

2 OR 3 CARDBOARD BOXES PRODUCED AT THE SAME TIME

- Specifically designed cutting and creasing units allow users to produce up to 3 boxes at the same time, and the design of units provides users with a wider variety of box production. Positioning of blades is fast and precise.

DUAL FEEDING

- Dual Feeding allows users to have two different z-fold cardboard raw materials with different specifications attached to Intelpack Z-Pro at the same time. Production is carried out by choosing the required raw material on the software without losing time and energy in changing cardboard raw materials.
